New Line of HVAC Chemical Products Helps Boost HVAC Efficiency

WEST SENECA, NY (April 01, 2014) – *HVAC ChemSM* -- a new brand of HVAC chemical products designed to increase the performance and extend the lifespan of air-conditioning and refrigeration systems -- is now available from Kemper System, a global leader in construction chemical products for more than 50 years.

The easy-to-use HVAC products include: coil cleaners, coil brighteners, scale removers, metal cleaning detergents, gas leak detectors, electronic cell cleaners, and degreasing solvents. The line also includes concentrated cleaners for ice machines, including metal-compatible products for coils and condensers.

HVAC ChemSM cleaning chemicals are manufactured by Kemper System America, Inc. at the company's ISO-certified facility and customer service center in West Seneca, N.Y.

“This line satisfies the need of commercial contractors and distributors who want a family of highly effective cleaning products from a reliable source,” says Tiffany Schettig, *HVAC ChemSM* Brand and Business Development Manager.

“AT AHR 2014, we generated high interest from contractors and from HVAC distributors both here and abroad. They like the fact that we’re dedicated to the HVAC maintenance market and support the drive to improve overall building efficiency,” she says.

For more information, visit *HVAC Chem* (HVACChem.com) or call: 917-588-2811.
